Elcometer 212 Digital Pocket Thermometer with Liquid Probe

### At a glance:

Rapid temperature measurement in under four seconds.

Water resistant case with integrated rubber seals

Foldaway probe for safe storage

°C / °F user switchable

The Elcometer 212 is a digital, pocket sized thermometer ideal for day to day use.

Incorporating a fast response, stainless steel liquid probe, the Elcometer 212 provides temperature readings in under four seconds.

Housed in a water resistant case with integrated rubber seals and a moulded flush window, preventing dirt and leaks damaging the LCD display, the Elcometer 212 is ideal for use in the harshest of environments.

The probe conveniently folds back into the side of the instrument, preventing damage when not in use.

- Units: User switchable between °C and °F
- Resolution: Can be set to 0.1°C/°F or 1°C/°F depending on the user's specific requirements.
- Auto-Off: The instrument will switch off automatically after 10 minutes of inactivity. This function can be disabled by the user if not required.

### **Climatic Testing**

The monitoring of climatic conditions such as temperature, relative humidity, dewpoint and moisture in industry is often vital to the success of the application of a coating. These parameters determine both the conditions for the application of the coating and the resulting quality and performance of the coated product.
