

Elcometer 308 Hygrometer

Elcometer 308 Hygrometer

At a glance:

 Reliable %RH and Surface Temperature readings in a single, user-friendly gauge without the need for additional equipment. Before painting it is necessary to check that the climatic conditions are suitable for the coating being applied. These are clearly specified on the paint manufacturer's product data sheet.

Surface temperature (Ts) and Relative Humidity (%RH) are two key climatic values which are specified on many data sheets.

The Elcometer 308 Hygrometer has been specifically designed for use in very hot climates where the surface temperature of the substrate can exceed the paint manufacturer's recommended limits for successful painting.

Painting outside recommended limits can have a detrimental affect on the performance and lifetime of the coating. The Elcometer 308 Hygrometer provides a simple and fast measurement of these two critical parameters.

Climatic Testing

The monitoring of climatic conditions such as temperature, relative humidity, dewpoint and moisture when coating is vital to the lifetime performance of the coating.

In the protective coatings industry, moisture can form on the surface when the surface temperature is low enough to cause condensation from the atmosphere. The Dewpoint Temperature (Td) is the point at which this occurs.

Monitoring air temperature (Ta) and its relative humidity (%RH) allows the dewpoint temperature to be calculated and compared to the surface temperature (Ts). The difference in temperature (TΔ) is the key parameter dictating when it is safe to apply the coating.

Rugged design

Suitable for use in extreme environments the Elcometer 308 is dustproof and waterproof with fully sealed sensors.

Measurement Hold / Release function

With a single button press readings are 'held' on the screen. These can then be recorded before simply pressing the button again to 'release' the screen and continue to take further readings as necessary.

Backlight

Bright screen making information easy to read – ideal in dark or confined spaces.

data sheet

TECHNICAL SPECIFICATION		
Operating Range	-20°C to +80°C (-4 °F to +176°F)	
	0% to 100% RH	
RH Accuracy	±3%	
Resolution	0.1°C (0.1°F) / 0.1%	
Power Supply	2 x AA 1.5V Batteries or via USB Cable	
Battery Life	Greater than 40 hours (Backlight off)	
Dimensions	180 x 75 x 35mm (7 x 3 x 1.4")	
Weight	300g (10.6oz)	
Part Number	G3081 Elcometer 308 Hygrometer	
Packing List	Elcometer 308 Hygrometer, wrist strap, 2 x AA batteries, protective pouch with belt clip, RH & surface probe calibration certificate and operating instructions.	

SPARES & ACCESSORIES		
Protective Carry Case / Pouch	T99921192	
USB Cable	T99921325	
Wrist Strap	T99916063	
Optional Full Calibration Certificate	TCAL-308F
